TITLES AND KEYWORDS FOR PAPERS

A
absorption 185
Absorption of nitrogen oxides using a baffle tray, Shadid, F. T. and Handley, D. 185
acentric factor 216
adaptive control 578
adaptive estimation 547
adsorption 232, 442
affinity adsorption 243
agarose matrices 243
agglomeration 301, 308
aggregation 301, 308
agitation 193
agitation power number 169
airlift reactor 451
alkaline 185
amino acid 232
Analysis and prediction of breakthrough curves for packed bed adsorption of water vapour on corn-meal, Hills, J. H. and Pirzada, I. M. 442
artificial intelligence 407
automated rig 255

B
baffles 278
baffle tray 185
batch processes 593
batch processing 495, 510, 517, 589
benzene 14
benzoquinone 14
bioproduct extraction 227
bioreactors 547
boundary layer development 255
breakthrough 442
bubble column 203
bubble point 329

C
calcination 48, 52
calcium carbonate 38
Cascade analysis for energy and process integration of batch processes. Part 1: Calculation of energy targets, The, Kemp, I. C. and Deakin, A. W. 495

Cascade analysis for energy and process integration of batch processes. Part 2: Network design and process scheduling, The, Kemp, I. C. and Deakin, A. W. 510
Cascade analysis for energy and process integration of batch processes. Part 3: A case study, The, Kemp, I. C. and Deakin, A. W. 517
cascades 262, 495
catalysis 3
chemical engineering 619
chemical reactors 381
China 619
circular loop reactor 423
circulating fluidized bed 20
circulation velocity 203
closed agitated vessels 169
coagulation 301, 308
Coagulation in turbulent flow: Part I, De Boer, G. B. J., Hoedemakers, G. F. M. and Thoenes, D. 301
Coagulation in turbulent flow: Part II, De Boer, G. B. J., De Weerd, C. and Thoenes, D. 308
coal combustion 457
coextraction 435
coking 632
combustion 348, 373
competition 232
completion time algorithm 593
compressibilities 216
compressibility factors 216
computer 348
concentration polarisation 255
condensation 87
Condensation of mixed vapours of hydrocarbons and water in a shell and tube condenser, Kim, J. S. and Webb, D. R. 87
condensers 127, 639
connectability 600
constraints 562
Continuous crystallization and subsequent solid-liquid separation of potassium sulphate. Part I: MSMPR kinetics, Jones, A. G. and Mydlarz, J. 283
Continuous crystallization and subsequent solid-liquid separation of potassium sulphate. Part II: Slurry filtrability, Mydlarz, J. and Jones, A. G. 294
control 3, 267, 273
controller tuning 555
control strategies 562
convection 121
copper 175
correlations 428
countercurrent extraction 96
Countercurrent extraction in a rising film column, He, W. and Baird, M. H. I. 96
cryogenic 121
crystal growth 283
crystallization 283, 294

D
Danckwerts Memorial Lecture: Legacy and growth—chemical engineering in China, Kwauk, M. 619
decomposition 38
density 329
design 199, 428, 639
Determination of individual phase transfer units, N_G and N_L, for a 0.6 m diameter distillation column sieve plate: methylcyclohexane–toluene system, Plaka, T., Ehsani, M. R. and Korchinsky, W. J. 316
detonation 373
Development and application of a risk assessment tool (RISKAT) in the Health and Safety Executive, Hurst, N. W., Nussey, C. and Pape, R. P. 362
Development of a diafiltration cascade system for the fractionation of a dextran hydrolysate, The, Barker, P. E., Poland, K., Till, A. and Alsop, R. M. 262
devolatilization 457
dextran 262
DIERS 199
diffuse interface 58
dispersion 348
dissolved solutes 79
distillation 145, 316
distillation columns 547
Drawdown and dispersion of floating solids in aerated and unaerated stirred vessels, The, Bakker, A. and Frijlink, J. J. 208
drying 457

E
economics 428
education 619
Effect of convection on plug formation during cryogenic pipe freezing, Burton, M. J. and Bowen, R. J. 121
Effect of liquid depth on circulation in bubble columns: A visual study, Chen, J. J. J., Jamialahmadi, M. and Li, S. M. 203
Effect of pulsatile flow on ultrafiltration fluxes in a baffled tubular membrane system. The, Finnigan, S. M. and Howell, J. A. 278
Effects of concentration boundary layer development on the flux limitations in ultrafiltration, Aimar, P., Howell, J. A. and Turner, N. M. 255
Effect of vessel and impeller geometry on impeller power number in closed vessels for Reynolds numbers between 40 and 65000, Papastefanos, N. and Stamatoudis, M. 169
efficiency 115
electrical conductivity method 211
electrical heating 159
electrically enhanced extraction 227
electrochemical 14
electroorganic 14
electrostatic spraying 227
emergency relief system 199
Emergency relief system design for runaway chemical reaction: Extension of the DIERS methodology, Fauske, H. K. 199
emissivity models 134
energy storage 495, 510, 517
energy use 278
entrainment 20
enzyme 273
equilibria 145
estimator 267
experiment 175
experimental 87
expert systems 407
Explosion hazard of air ingress into flare stacks, Tite, J. P., Greening, K. and Sutton, P. 373
explosions 339, 373
extraction 96, 175

F
fault diagnosis 407
fault trees 381
fault-tree synthesis 407
fermenters 267
Ferric chloride leaching of Saskatchewan uranium ores, Muthuswami, S. V., Nirdosh, I. and Achong, C. A. K. 435
film mass transfer 96
filtrability 294
fired heaters 134
flame propagation 339
flammable 362
flammable gases 339
flexible operation 593
floating solids 208
flowing characteristics 423
Flowing characteristics in a circular loop reactor, Tanaka, M., Sendai, T. and Hosogai, K. 423
flow pattern 203
flow visualization 203
fluidization 30
fluidized beds 457
flux enhancement 278
food processing 159
fouling 255
fractionation 262
fractionation diagram 273
freezing 121
functional controllability 600
fuzzy logic 267
Fuzzy state estimator for fed-batch fermentation, A, Postlethwaite, B. E. 267

G
gas holdup 451, 526
gas-liquid 193
gas mixtures 216
gas quenching 632
gas solid 58
gas-solid fixed bed reactor model 66
gas-solid reactions 76
gas/solids suspensions 30
Generalised diffuse interface model of gas-solid non-catalytic reaction in a fixed bed, Mutasher, E. I., Khan, A. R. and Bowen, J. H. 66
generic rank 600

H
HAZOP 407
heat exchanger networks 481, 510
heat exchangers 115
heat recovery 517
heat transfer 127, 159, 451
Heat transfer in airlift reactors, Ouyoung, P. K., Chisti, M. Y. and Moo-Young, M. 451
Heat transfer and pressure drop in a shell and tube condenser with plain and low-fin tube bundles, McNaught, J. M. and Cotchin, C. D. 127
helical and spiral tube coils 428
High pressure PVT and viscosity measurements on North Sea crude oil-NGL mixtures, Ahrabi, F., Ashcroft, S. J. and Shearn, R. B. 329
Hollow blade agitator for dispersion and mass transfer, The, Warmoeskerken, M. M. C. G. and Smith, J. M. 193
hydrodynamics 193

I
immiscible condensates 87
impeller power number 169
impellers 193, 208
individual 362
inferential control 547
inferential estimation 547
interfacial area 211, 526
isotherms 232, 442

J
jet penetration 211

K
K_2SO_4 294
Karman vortex street 203
kinetic 48
kinetic model 38
kinetics 38, 52, 442
Kinetics of calcium carbonate decomposition, Rao, T. R., Gunn, D. J. and Bowen, J. H. 38

L
large-scale systems 600
leaching 435
limestone 48, 52
liquid film 96
Liquid splashes from submerged gas injection, Koh, P. T. L. and Batterham, R. J. 211
liquid splashing 211
low-finned tubes 127
luminous flames 134

M
major hazards 348, 362
mass transfer 243, 457
mathematical modelling 134, 243
mathematical models 115
membrane 262, 278
Methods for estimating the dispersion of toxic combustion products from large fires, Carter, D. A. 348
methylcyclohexane-toluene separation 316
microcomputer 3
missiles 353
mixer-integer programming 600
mixing 193, 373, 423, 537
mixing rules 145
model 20, 348
modelling 185, 632
Modelling the affinity adsorption of Immunoglobulin G to Protein A immobilised to agarose matrices, Horstmann, B. J. and Chase, H. A. 243
Modelling of coke formation in gas quenchers of industrial ethane cracking furnaces, Huntrods, R. S., Nighswander, J. A., Mehrotra, A. K. and Behie, L. A. 632
Modelling of thermal radiation in fired heaters, Murty, C. V. S., Richter, W. and Krishna Murthy, M. V. 134
model uncertainty 555
moving boundary 76
moving time horizon 562
MSMPR 283, 294
multicomponent 87, 232
multiplant 589
multiproduct 589
Multi-step, Newton-type control strategies for constrained, non-linear systems, Li, W. C. and Biegler, L. T. 562
multivariable systems 578

N
natural gas 373
New approach to design of vacuum condensers, A, Webb, D. R., Bird, R. and Mangnall, K. 639
nitrogen 185
non-catalytic 58, 76
Non-catalytic, gas-solid reactions—a diffuse interface model, Bowen, J. H., Khan, A. R. and Mutasher, E. I. 58
nonlinear processes 562
non-Newtonian 526
non-Newtonian liquids 537
North Sea crude oil-NGL mixtures 329
Note on a simple model for non-catalytic gas-solid reaction, A, Villa, L. T. and Quiroga, O. D. 76
nucleation 283

O
ohmic heating 159
On-line controller tuning of second order dead time processes, Bogere, M. N. and Ozgen, C. 555
on-line identification 555
on-line measurement 273
On the scaling of vapour cloud explosion experiments, Van Wingerden, C. J. M. 339
optimisation 481, 589
Optimization of fractional precipitation for protein purification, Richardson, P., Hoare, M. and Dunnill, P. 273
Overpressure protection of batch chemical reactors, Marrs, G. P., Lees, F. P., Barton, J. and Scilly, N. 381
oxidation 14
oxides 185

P
parameter estimation 578
People's Republic of China 619
Phase separation in an experimental mixer-settler, Eckert, N. L. and Gormely, L. S. 175
Pilot plant for the study of the characteristics of a tubular fixed bed catalytic reactor, A, Wardle, A. P. and Feyo de Azevado, S. 3
pinch technology 481, 495, 510, 517
pipes 121, 373
plate efficiency 316
plug 121
point efficiency 316
polymers 145, 262
poolfire 348
porous diffusion 243
power consumption 526
Power consumption, gas hold-up and interfacial area in aerated non-Newtonian tanks of square cross-section, Koloini, T., Plazl, I. and Zumer, M. 526
Power consumption of anchor impellers in Newtonian and non-Newtonian liquids, Shamlou, P. A. and Edwards, M. F. 537
power input 537
precalciner 52
precipitation 283, 294
Predicting effect of dissolved solute on the vapour-liquid equilibria of organic solvent mixtures and aqueous organic acid solutions, Tan, T. C. and Ti, H. C. 79
Pressure drop performance of coiled tubes, Ali, S. 428
pressure drops 127, 423
pressure loss 428
pressure relief 381
pressure vessel 353
process control 578
process integration 495, 510, 517
process variability 593
production planning 589
Protein A 243
protein precipitation 273
pulsatile 278

Q
qualitative reasoning 407
Qualitative simulation and fault propagation in process plants, Waters, A. and Ponton, J. W. 407

R
Ra(226) 435
reaction 14
reaction interface 76
reactor 3
Reactor analysis of multiple order series electrochemical reactions: an analysis of the electro-oxidation of benzene to *p*-benzoquinone, McConvey, I. F., Haines, A. N. and Scott, K. 14
regime diagram 30
Reynolds number regime 428
risk assessment 362, 381
Role of adsorption isotherms in the design of chromatographic separations for downstream processing, The, Gosling, I. S., Cook, D. and Fry, M. D. M. 232
runaway 199
Rupture of a gas-pressurised cylindrical pressure vessel: The dynamics of end-cap missiles, Baum, M. R. 353
rupture 353

S
safety 381
salts 145
scale effect 339
scheduling 510, 517, 589, 593
second-order process models 555
self-tuning control 578
settler 175
Shape and conductivity effects in the ohmic heating of foods, De Alwis, A. A. P., Halden, K. and Fryer, P. J. 159
shear rates 301, 308
shells 481
shell and tube condenser 87
shell and tube heat exchangers 115, 127
shrinking core 76
sieve plate 316
Simple method for estimating the compressibility factors of gas mixtures, A, Pollitt, R. R. 216
simulation 267
single pellet 58
societal 362
Soft-sensing: A solution to the problem of measurement delays, Tham, M. T., Morris, A. J. and Montague, G. A. 547
solute-solvents mixture 79
solvent 175
Solving the production planning problem for parallel multiproduct plants, Espuna, E. and Puigjaner, L. 589
square agitated vessels 169
square cross-section 526
State-space formulation of multivariable self-tuning controllers, Perez-Correa, J. R. and Kershenbaum, L. S. 578
state-space methods 578
sterilisation 159
stirred tanks 301, 308, 526
stirred vessels 208
Strategies for operating batch plants subject to variability—a performance assessment, Cott, B. J. and Macchietto, S. 593
Structural analysis and synthesis of feasible control systems—theory and applications, Georgiou, A. and Floudas, C. A. 600
structural properties 600
synthesis 481

T
targets 481, 495
Targets and design for minimum number of shells in heat exchanger networks, Ahmad, S. and Smith, R. 481
Th(230) 435
Thermal calculation of multiphase shell and tube heat exchangers, Roetzel, W. and Spang, B. 115
Thermal decomposition of Cauldon limestone in a thermogravimetric analyser, Khraisha, Y. H. and Dugwell, D. R. 48
Thermal decomposition of limestone in a suspension reactor, Khraisha, Y. H. and Dugwell, D. R. 52
thermal radiation 134
thermogravimetric analysis 48
thermogravimetrics 38
three-phase system 208
time-delay systems 547
time effects 495
toxic 348, 362
trajectory 353
transfer line exchangers 632
Transfer processes local to the coal particle: A review of drying, devolatilization and mass transfer in fluidized bed combustion, Agarwal, P. K. and La Nauze, R. D. 457
transfer units 316
trip systems 381
turbulence 301, 308
turbulent flow 339
two-phase flow 127, 199, 203
two-phase systems (gas/liquid) 211

U
ultrafiltration 255, 262, 278
ultrapyrolysis 632
unbalanced passes 115
unreacted core 76
Upward flow of gas/solid suspensions. Part I: A model for the circulating fluidized bed incorporating dual level gas entry into the riser, The, Rhodes, M. J. and Geldart, D. 20
Upward flow of gas/solid suspensions. Part II: A practical quantitative flow regime diagram for the upward flow of gas/solid suspensions, The, Rhodes, M. J. 30
uranium 175, 435
uranium ore 435

V
vacuum 639
vapour–liquid 145
Vapour–liquid equilibria in complex mixtures, Heidemann, R. A. and Fredenslund, Aa. 145
vapour-liquid equilibrium 79
vapour phase compositions 329
variable coefficients 115
velocity 353
velocity distribution 423
viscosity 329

W
warehouse 348
whole broth extraction 227
Whole broth extraction in an electrically enhanced liquid liquid contact system, Millar, M. K. and Weatherley, L. R. 227

REGULAR FEATURES
Contents of The Canadian Journal of Chemical Engineering 109, 202, 336, 347, 544, 561
Doctorates in Chemical Engineering 1987–88 110
